Data is accessed by contract id in remix ethereum compiler!!

The screenshot displays the Remix Ethereum IDE interface. On the left, the 'DEPLOY & RUN TRANSACTIONS' panel shows the contract 'STUDENTRECORD' deployed at address '0x066...2636F (BLOCKCHAIN)'. Below this, a list of transactions is shown, including a 'Batch' transaction and a 'getDetails' transaction. The main editor displays the Solidity code for the 'StudentRecord' contract, which includes a constructor and a 'getDetails' function. The bottom panel shows the transaction details for the 'getDetails' call, including the transaction hash and the data being passed to the function.

```
pragma solidity ^0.4.18;

contract StudentRecord {
    string public Name;
    uint public RollNo;
    string public Batch;
    uint public Maths;
    uint public Physics;
    uint public Chemistry;
    uint public English;
    string public Status;

    function StudentRecord(string name , uint rollNo,string batch,uint maths,uint physics,uint chemistry,uint english,string status)public{
        Name=name;
        RollNo=rollNo;
        Batch=batch;
        Maths=maths;
        Physics=physics;
        Chemistry=chemistry;
        English=english;
        Status=status;
    }

    function getDetails() public view returns(string , uint ,string ,uint ,uint ,uint ,uint ,string){
        return(Name,RollNo,Batch,Maths,Physics,Chemistry,English,Status);
    }
}
```

Transaction details for 'getDetails':

- 0: string: HARSH VERMA
- 1: uint256: 88
- 2: string: A
- 3: uint256: 88
- 4: uint256: 88
- 5: uint256: 88
- 6: uint256: 88
- 7: string: PASS

Transaction call details:

call to StudentRecord.getDetails

CALL [call] from:0x380912af111cd0840944A800385D8239391eb996 to:StudentRecord.getDetails() data:0xfbb...f93a0
